**FLEXIBLES LIGERAS AJUSTABLES**

*Always Fit*

---

Gafas de sol deportivas ajustables.

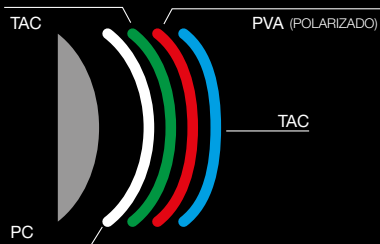

Sujeción total a la cabeza sin presión.

Gran ligereza y confort.

Flexibilidad.

Tecnología y calidad óptica.

---

## 100% PROTECCIÓN UV400

CONTRA LA LUZ ULTRAVIOLETA

Nuestras lentes han sido fabricadas con **polycarbonato**, un material orgánico diez veces más resistente a los golpes que otros materiales. **100% de protección UV400** contra la luz Ultravioleta además de dotarlas de una **gran ligereza**.

## WATER REPELLENT TRATAMIENTO SUPER HIDROFÓBICO

Las lentes con el tratamiento **Water Repellent** incorporan un sistema **súper hidrofóbico** para que los líquidos resbalen sin ocasionar manchas ni rayaduras.

## TRATAMIENTO ESPECIAL HG-1600

ELIMINA EFECTO “ARCOIRIS”

**IMPORTANTE:** Secar la gafa con un paño seco después de estar expuesta al agua y si la gafa está expuesta a agua de mar (salada), mojar con agua dulce y secar con un paño seco.

- Buen rendimiento óptico
- Resistencia de abrasión excelente
- Mejor nitidez y claridad óptica
- Baja viscosidad

ELIMINA EL RESPLANDOR  
MOLESTO DE SUPERFICIES COMO EL AGUA, LAS  
LLANURAS, EL ASFALTO O LA NIEVE

## LONG LIFE POLARIZED®

El tratamiento polarizado se aplica directamente a la lente durante un excepcional proceso de fabricación, **evitando la superposición de varias capas pegadas entre si** con pegamento y otros materiales que dificultan la visión.

## EFECTO DIAMOND

CARA EXTRA DE PROTECCIÓN EN LAS LENTES  
PARA SITUACIONES EXTREMAS

El **efecto Diamond** es un **exclusivo tratamiento** estético que proporciona una **capa extra de protección** a las lentes en **situaciones extremas** como puede ser la luz en la playa o en el mar.

## EFECTO REVO

RECUBRIMIENTO MULTICAPA,  
QUE PUEDE OSCILAR ENTRE 8 Y 12 CAPAS

Tratamiento estético que da un **efecto espejo** a la lente y evita la penetración de los rayos solares.

VISIÓN NÍTIDA  
TRATAMIENTO  
**ANTIRREFLEJANTE**

Con la aplicación de un **revestimiento multicapa** en la parte interior, las lentes evitan que los rayos de luz que lleguen por detrás de la lente reboten y entren en los ojos.

**EFECTO FLASH**

REVESTIMIENTO DE  
ESPEJO PARCIAL

Una suave capa uniforme que da **brillo a la lente**, tanto para luces brillantes como bajas.

# SLASTIKSUN TITAN

**Boxing:** 56 mm

**Puente:** 19 mm

**Frontal:** 136 mm

**Lente:** Base 10

El diseño **TITAN** incorpora cierre **frontal magnético**, **ajuste perimetral**, **head-band** flexible elastomérico y sistema de **ajuste telescópico** para proporcionar lamayor comodidad y confort a la hora de practicar deporte.

## **Novedad exclusiva**

Incorpora una **barra frontal anti-sudor intercambiable**, ajuste laterales de las varillas hacia arriba o hacia abajo para propiciar la ventilación o para evitar las molestias del viento de cara.

## Lenses with **Anti-glare** treatment

The anti-glare treatment on the outside of the lens allows the transmission of the maximum amount of light for sharper vision.

The application of a multi-layer coating on the outside of the lens avoids rays of light coming in from behind and bouncing off the lenses going into the eyes.

## **Polarized** Lenses

**100% UV400 Protection**

A hard layer over the surface of the lenses makes them highly scratch-resistant.

**Anti-glare**, with a 99.8% Polarized efficiency

**Highly impact resistance** According to the safety standards ANSI Z87.

**Meets Safety Standards** Optical ANSI Z80.3, ANSI Z80.7, AS/NZ1067 and EN1836 Optical Class I

## Lenses with **Super Hydrophobic** treatment

With water-resistant lenses we achieve a very effective performance

### **Stain resistant**

To avoid the deposit of oil or dirt on the lenses and to facilitate their cleaning.

### **Scratch resistant**

To improve the smoothness of the surface of the lenses and to protect them against scratches and abrasions.

### **Dust resistant**

To avoid dust adhering to the lenses and to facilitate their maintenance.

### **Water resistant**

It allows liquid to run off the lenses without scratching them, reducing the distortion.

### **Visual comfort**

With these benefits, the lenses can be kept clean and in good condition, reducing visual fatigue.

## Polycarbonate lenses **100% UV400 protection**

Polycarbonate is an organic material (plastic) that was developed in the 1970's for use in the aerospace industry and began to be used on the visors of astronaut helmets and on the windscreens of spaceships.

- **Light-weight**
- **Break resistant**  
(up to 10 times more resistant)
- **Total Protection from UV rays**  
(100% UV400)

### **Solar Category 3** (9-18% transmittance)

- Appropriate for every day use
- Suitable for driving
- Not adapted for extreme conditions  
(snowy environments)

## Special **Treatment HG-1600**

Eliminates the “rainbow effect”

- **Good optical performance**
- **Sharper and clearer image**
- **Excellent resistance to abrasion**
- **Low viscosity**

**Important:** Dry glasses with a soft, dry cloth after getting wet and if the glasses are exposed to salt water, rinse with tap water and dry with clean, dry cloth.

### PACK URBAN METRO/METRO FIT

- Polycarbonate lenses, Cat. 3 with anti-rainbow treatment.
- Superior quality microfibre case. (-30% polyamide /70% polyester)
- Semi-rigid case.

### PACK SPORT FALCON/EAGLE

- Polycarbonate lenses, Cat. 3 with anti-rainbow treatment.
- Additional pair of colourless lenses.
- Superior quality microfibre case. (-30% polyamide /70% polyester)
- Semi-rigid case.

Patent ES201330568

## Thermoflex-Soft

- Elastomeric
- Flexibility
- Recovery
